

Tunisian Arabic / Arabizi Profanity Detection Seed List (For Moderation Use)

This document contains a seed lexicon and patterns for detecting offensive content in Tunisian Arabic (including Arabizi variations). It is intended for automated content moderation systems (e.g., RAG-based filtering).

High Severity (Sexual / Strong Insults - use as stems)

- nik / nayk / nikk (sexual root variations)
- zeb / zebi / zob (sexual slang roots)
- 9a7b / kahba / kahb (strong insult family)
- t7in / nayek (very offensive variants)

Medium Severity (General insults)

- 7mar / hmar (donkey insult)
- kalb / kelb (dog insult)
- bhim (stupid)
- jahel (ignorant)
- 3abd (offensive term)

Low Severity / Contextual

- tfou (spit insult expression)
- barra (go away - context dependent)

Regex Patterns for Detection

- n+i+k+
- z+e+b+i*
- q+a+h+b+a*
- h+m+a+r+
